

"Professional Reflexology.....better health naturally"

COVID-19 Safe Checklist for Reflexologists

The following is a guideline to assist our members with the reopening of their clinic and precautions to help reduce the spread of COVID-19. This checklist is a key part of your Reflexology business COVID-19 Plan and is adapted from the Qld WorkSafe website, Tas WorkSafe Small Business Safety Plan and ACT Health Guidance for Massage Therapists Plan. You must publicly display this signed checklist as evidence that you are a COVID-19 Safe business and provide a signed copy either hard copy or electronically if requested from a relevant compliance/enforcement officer.

Therapists must also remain informed and compliant with any further directions issued by their State Department of Health. It is important that those relying on therapy to maintain their health continue to have access to these services during this public health emergency.
